

HEALTHY HOME PROGRAM

featuring
BioProtect *us* system

ViaClean Technologies is proud to announce it's **Healthy Home Program**. This program includes a broad range of state of the art services and technologies associated with the control of indoor air quality with a particular emphasis on the diagnosis, control and management of bacterial/microbial contamination.

Our team developed the Healthy Home Program (HHP) featuring our bound antimicrobial technologies to protect your two largest assets, your families health and your home.

The implementation of the **Healthy Home Program** can minimize the risk of microbial and bacterial induced problems for people, homes and humanity by controlling the growth and spread of harmful bacteria.

The keystone of the **Healthy Home Program** is the integration of the **BioProtect us** system. This system and its proprietary state of the art technologies offer best in class disinfecting capabilities, patented filtration devices, and a unique antimicrobial surface modifying technology that provides continuous and persistent protection to “us”.

According to the EPA, indoor air pollution is one of the top five Environmental Health risks

Conventional formulas are designed to kill microorganisms by poisoning the cell. This kill method is leaching and also allows for the cell to

adapt and grow immunity, helping to create what are known as superbugs, while leaving NO residual protection. Our **BioProtect us** system and solutions are non-leaching and kill microorganisms by puncturing and disintegrating the cell on contact, while leaving months of residual protection and inhibiting the creation of superbugs. One of the benefits of our **BioProtect us** system is the persistent and residual protection against a remarkable array of bacteria and pathogens.

BioProtect us system offers multi-faceted solutions, using numerous products including the EPA registered **BioProtect** formulas which are non-leaching, therefore are safe for humans, pets and the environment!

Our goal is a healthy, stable environment for you and your family!
